

SAUMYA BHARDWAJ

Delhi, India | +91 9717831874 | samisharma000@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

B.Tech CSE graduate (2026) specializing in AI/ML, with hands-on production experience building full-stack web applications using the MERN stack, Next.js 14, TypeScript, REST APIs, JWT and cloud infrastructure (Azure, Vercel). Delivered real-world projects including a live VS Code extension (CodeGuard AI) and a real-time network packet inspection dashboard. Solved 200+ DSA problems on LeetCode. Seeking a Full Stack Developer or SDE role where I can contribute scalable, production-ready solutions.

KEY PROJECTS

VeloRAG – Interactive Vector Search & Local RAG Playground | [Link](#) | [Github](#)

- Developed an interactive, high-performance Vector Database sandbox implementing HNSW (Hierarchical Navigable Small World), KD-Tree, and Brute-Force algorithms, incorporating PCA-based 2D projections via Altair to visualize spatial search query vectors in real-time.
- Architected a dual-LLM RAG pipeline featuring a local-to-cloud broker (local Ollama Llama 3.2 falling back to Groq Cloud API with Llama-3.1-8b-instant). Containerized the stack using Docker Compose and established automated Black linting checks via GitHub Actions.

DPI Control Plane – Real-Time Network Packet Inspection Platform | [Link](#) | [Github](#)

- Built a full-stack Deep Packet Inspection dashboard using React, Node.js, and Python with Scapy for live network traffic capture, and PCAP upload analysis. Deployed on Microsoft Azure VM(Ubuntu 22.04) with Nginx reverse proxy, PM2, and SSL.
- Implemented JWT-based role system (Admin/Viewer) with Supabase PostgreSQL for access control — admins manage blocking rules while viewers access read-only PDF report exports.

Meloque – AI Powered Content Publishing Platform | [Link](#) | [Github](#)

- Developed a production-grade MERN blogging platform with Gen AI-powered Blog Assist (descriptions, tags, full content from title), daily usage limits, failure-safe logic, and real-time likes, comments, follows, and push notifications via Socket.IO and Firebase Cloud Messaging.
- Built a rich authoring and discovery experience using Editor.js, debounced search, JWT authentication, Redux Toolkit, and Cloudinary image uploads.

WORK EXPERIENCE

Full Stack Web Developer

Sept 2022 – April 2023

APK WEBTECH | Internship | On-Site

- Developed and maintained responsive web applications using PHP, MySQL, HTML, CSS, and JavaScript, delivering seamless user experiences across devices and increasing user engagement by 55%.
- Designed and optimized backend APIs with efficient session management, improving data retrieval performance by 25%.
- Optimized frontend performance through code minification and image compression, reducing page load time by 35% and improving Core Web Vitals scores across production deployments.

TECHNICAL SKILLS

Programming Languages : Java, Python, JavaScript(ES6+).

Frontend : React.js, Next.js, Tailwind CSS, TypeScript, HTML, CSS, Framer Motion.

Backend: Node.js, Express.js, REST APIs, JWT, Bcrypt.js, WebSocket, Kafka.

Databases & Cloud : MongoDB, MySQL, Redis, Cloudinary, Firebase.

DevOps & Infrastructure: Docker, CI/CD, Azure VM, Git/GitHub, Vercel, Render, Postman.

Soft Skills: Problem Solving, Team Collaboration, Debugging, Communication.

EDUCATION

Maharshi Dayanand University (MDU)

Sep 2023 – Present

Computer Science and Engineering | B.Tech (75%, Ongoing)

Guru Nanak Dev Rohini Campus (DSEU)

Sep 2020 – June 2023

Computer Science | Diploma in Computer Engineering (81%)

ACHIEVEMENTS & CERTIFICATIONS

Certifications: Career Essentials in GitHub [[GitHub](#)], Docker Foundations [[Docker](#)], Microsoft Azure Essentials [[Microsoft](#)], Kubernetes: Microservices [[LinkedIn](#)], Web Design and Development [[SkillIndia](#)].

Professional Development: Successfully completed TCS iON Career Edge – Young Professional by Tata Consultancy Services (TCS) covering Communication, Soft Skills, Resume Writing, Interview Skills & Overview of AI. [[View Certificate](#)]

Code Quality: Improved maintainability by reducing code duplication by 25% through strategic refactoring.
